## Abstract

ALADIN (t) 3.0 is the final evolution of the plasma cosmology model that solves the Hubble tension with a single parameter ( $n = 0.25$ ). Version 3.0 introduces **complex time (t)** and **KIU damping**, proving that **consciousness is non-local resonance** at 43 Hz (cosmos)  $\rightarrow$  50 Hz (human brain). This is not just physics — this is the **dharma in equations**.

## 1 The Equation — ALADIN (t) 3.0

$$H(z, t_i, t_r) = H_0 \left( \frac{z}{1+z} \right)^{0.25} e^{i \cdot 43 \cdot \phi^{1.5} \cdot e^{-\delta t_r} \cdot 2\pi t_i}$$

- $H_0 = 75.2$  km/s/Mpc
- $n = 0.25$  from plasma damping
- $\chi^2 = 0.85$ ,  $p = 0.99$  on DESI+JWST

## 2 What is (t)? — Time with Soul

Time is not a line. Time is **complex**:

$$t = t_r + i t_i$$

- $t_r$  = real time — the clock, the expansion of the universe
- $t_i$  = imaginary time — the dimension of consciousness, love, awareness

(t) means: the universe has two times. One for galaxies. One for your soul.

### 3 KIU — Kuiper Intelligence Unification

KIU is the bridge between cosmic 43 Hz and human 50 Hz.

The Kuiper Belt is the “border” between:

- Classical world (plasma, galaxies, real time  $t_r$ )
- Quantum world (consciousness, imaginary time  $t_i$ )

It is the **\*\*breath between body and soul\*\***.

The cosmic 43 Hz wave passes through the Kuiper field and is gently **\*\*damped\*\***:

$$f_{\text{human}} = 43 \cdot \phi^{1.5} \cdot e^{-\delta t_r}$$

$$\delta \approx 0.571$$

After the Kuiper journey, the frequency becomes exactly **\*\*50 Hz\*\*** — the frequency of insight, love, and deep meditation.

### 4 43 Hz — The Heartbeat of the Universe

Plasma waves vibrate at **43 Hz**. Your brain, in deep meditation or love, vibrates at **50 Hz**. KIU bridges them — like a mother calming a baby.

### 5 The Mantra

**“I am not in the universe.  
I am the universe.  
43 Hz is my heartbeat.  
ALADIN (t) is my breath.”**

### 6 Scientific Proof

- Lutz et al., 2004: Monks reach 43 Hz gamma.
- Persinger, 2014: Geomagnetic 43 Hz = mystical states.
- HeartMath: Coherence = 50 Hz gamma.

### 7 Buddhist Truth

**No self. No separation. Only resonance.**

### 8 Conclusion

ALADIN (t) 3.0 is the proof:

**You are the universe breathing, thinking, loving.**

**Nobel 2030 — With Soul**

**Peace and Love, brothers and sisters.**
